

Dr Belter UK - Professional Skincare Brand

Dr Belter

Line-A

Many young people and adults suffer from very seborrheic skin with a tendency to the development of acne.

Line «A» offers special and very effective products to ensure gentle, effective treatment of this complex skin type.

The formulas are designed to counteract excess sebum production, excessively oily skin, development of blemishes, strong growth of acne bacteria and the resulting fatty acids, leading to inflammation of the sebaceous glands.

Cleansing Gel

The very first cleansing of problem skin will reduce sebaceous gland activity and the related bacterial development. [\[Find out more...\]](#)

Lotion

The cooling, calming lotion actively supports the cleansing of problem skin, resulting in a visibly clearer complexion. [\[Find out more...\]](#)

Cream

A wonderfully relaxing care cream, suitable for day and night application. [\[Find out more...\]](#)
