

Dr Belter UK - Professional Skincare Brand

Dr Belter

Line-N

The Line N care range is the basic care range of DR.BELTER COSMETIC, containing gentle, nature and biological ingredients. It contains products with simple application and suitable for virtually every type of skin.

The preparations in the Line N are suitable for younger skins as well as those using a care range for the first time. The creams in this care range are all 24 hour products, i.e. they can be applied any time throughout the day or night. In addition to its general care effect, excellent skin tolerance and extra gentle perfuming effect, each product is designed to have specific, individual effects.

The active interaction between millions of skin cells is also reflected in a face's beauty, youthful appearance and radiance. In order to maintain and safeguard the maximum properties, tautness and freshness of the skin, the care products in the Line N were developed to assist and protect the skin's performance, to improve its moisturising property and to build up a firmer, smoother texture.
