Stimula

With the «stimula» products, mature and listless skin receives multi dynamic anti-ageing care. Precious plant lipids are composed to deliver extraordinary suppleness. The advanced promedical actives, such as isoflavones, Belissime® Aqua, Camelia Japonica, Retinol, Neurobiox® and hyaluronic acid spheres, are used to comprehensively revitalize prematurely-aged skin.

The cell reviving product formulas together with the professional treatment concepts stimulate visible skin rejuvenation.

The silky, rich textures, alongside the new White Lotus essences, deliver an exquisite, sensual experience. Three care groups, each comprising a multi active concentrate, a regenerating cream and special treatment cover different skin needs and conditions.
